

# Mosquito Quest

Fact sheet

## Why should we care?

*The most dangerous animal in the world is the mosquito*

*The Aedes mosquito spreads both the dengue and zika virus*

*Do your part to reduce mosquito breeding*

Currently, there is no cure for dengue or zika virus

## What is Mosquito Quest?

*Mosquito Quest* is a 3D virtual reality experience developed by Bayer that complements the Mosquito Learning Lab to test user's skills at finding potential mosquito breeding sites inside a home.

The experience immerses the user in a typical real-life situation that they can relate to.

The goal for each user is to score a maximum of 10 points by finding all potential mosquito breeding sites.

- // 8 potential mosquito breeding sites:
  - // 6 sites which are easier are worth 1 point
  - // 2 sites which are difficult are worth 2 points
- // Sites are located in 4 rooms:
  - // Living room, bedroom, kitchen/dining room, & bathroom

**Mosquito Quest**

## Objectives

*Community*  
*Emphasise everyone's responsibility to preventing mosquito breeding*

*Educate*  
*Maximise the key messages in the most engaging way*

*For all*  
*Suitable for everyone*

## Try it now

Download the Mosquito Quest app for use on any VR device

Any smartphone

VR headset or VR cardboard
